Personal Statement

Full-stack software engineer with 5+ years of experience building scalable web and mobile applications, designing system architectures, and delivering cross-platform solutions. Proven track record in leading end-to-end product development from UX design and backend engineering to deployment and optimization across education, health, governance, and enterprise systems. Strong expertise in JavaScript ecosystems (React.js, Node.js, React Native), Laravel, and ERP systems, with a focus on performance, usability, and agile collaboration.

Professional Experience

Founder & CEO – Nexora Tech

April 2025 – Present | Doha, Qatar

- Leading development of AI-driven platforms for analytics, automation, and digital transformation.
 - Overseeing system architecture, backend engineering, and product strategy.
 - Managing cross-functional teams and client-facing technical delivery.
-

Project Manager – Omega-Gate Tech

Feb 2024 – Present | Tripoli, Libya

- Implemented AI and digital systems serving **200,000+ users** across health, education, and local governance.
 - Delivered ICT and digital transformation trainings to **150+ staff**, increasing digital readiness by **20%**.
 - Designed M&E tools that reduced reporting and response time by **30%**.
-

IT Expert & Web Developer – VNG International

Jan 2023 – Feb 2025 | Libya

- Led digital recovery platforms benefiting **75,000+ residents**.
 - Developed and deployed sustainable digital tools for local authorities.
 - Trained municipal teams on system adoption and long-term maintenance.
-

Trainer (App & Web Development) – Chemonics International

Dec 2023 – Mar 2025 | Sebha, Libya

- Delivered hands-on training programs in web and mobile development.
 - Upskilled **16 trainees**, achieving a **76% improvement** in design and development capabilities.
-

Founder & CEO – Technopole

Jan 2023 – Present | Tripoli, Libya

- Founded and led a technology company delivering software solutions and digital platforms.
 - Managed product development, client engagement, and technical delivery.
 - Oversaw full lifecycle development using modern web and mobile stacks.
-

Tech Lead – Genico

Apr 2022 – Oct 2025 | Istanbul, Türkiye

- Led frontend and backend development teams on multi-platform applications.
 - Defined system architecture and coding standards.
 - Mentored developers and improved delivery efficiency.
-

Volunteer (Youth & Governance) – UNDP

Oct 2022 – Jan 2023

- Led governance and digital literacy workshops for municipalities and youth groups.
 - Supported civic engagement initiatives through digital tools.
-

Project Officer – Handicap International

Mar 2021 – Jul 2022

- Managed recovery and development programs serving **150,000+ beneficiaries**.
 - Secured **\$750K** in project funding.
 - Improved project efficiency by **40%** through better planning and monitoring systems.
-

Full-Stack Developer – MDIT

Dec 2020 – Feb 2021

- Built and maintained platforms used by **30,000+ users**.
 - Increased user engagement by **50%** through performance optimization and UX improvements.
-

Back-End Developer – Technlines

Aug 2020 – Oct 2020 | Tripoli, Libya

- Developed backend services and APIs using PHP and Laravel.
 - Worked closely with frontend teams to deliver integrated solutions.
-

Educational Background

- **Google Cybersecurity Certificate (2025)**
- **Google Project Management Certificate (2024)**
- **Mckenzie and Company, Online, Forward Program (2024)**

- **BSc in Computer Engineering**, University of Tripoli (2020)
 - **ReBootKamp JS Full Stack Developer**, Tunisia (2020)
-

Applied Machine Learning & Research

- **AlgoVerse AI Research Program (2026)**
 - Co-authored applied research paper on **AI system evaluation and model behavior analysis**
 - Worked on **LLM benchmarking, dataset construction, and experimental validation**
 - Applied ML techniques to real-world problem settings with measurable performance outcomes
-

Technical Skills

Frontend:

Vanilla JS + HTML5, TypeScript, React.js, Next.js, Vue.js (SFC, TSX), React Native (CLI, Expo)

Backend:

Node.js, Bun.js, Laravel, PHP, Golang

Styling & UI:

CSS3, Tailwind CSS, Bootstrap, SCSS, SASS, Styled Components

Databases & Storage:

MongoDB, MySQL, Postgres, Redis, Firebase Firestore, Oracle Database (SQL, PL/SQL)

DevOps & Cloud:

Linux (Bash Scripting, Systemd), Git, Nginx, GitHub Actions, Docker, Apache, AWS, Firebase, Vercel, DigitalOcean, Heroku

ERP & Enterprise Systems:

Frappe Framework, ERPNext (v14–v15), Oracle APEX
